### 1. Revision History

Revision	Date	Author	Description
A	8/21/2007	Software Engineering Group	Initial draft
B	9/24/2007	Software Engineering Group	
C	11/29/2007	Software Engineering Group	Release 4.000
D	4/3/2008	Software Engineering Group	Beta Release 4.006
E	4/14/2008	Software Engineering Group	Release 4.100
F	7/21/2008	Software Engineering Group	Beta Release 4.101
G	7/25/2008	Software Engineering Group	Release 4.200
H	01/16/09	Software Engineering Group	Beta Release 4.201
I	05/29/09	Software Engineering Group	Beta Release 4.207
J	07/15/09	Software Engineering Group	Release 4.300
K	09/23/09	Software Engineering Group	Release 4.400

### 2. Overview

This release contains improvements and enhancements, which are listed in the new features section of this document, as well as fixes to reported problems from previous release (4.400).

### 3. New Features

(none)

### 4. Feature improvements and known issues fixed in this release

- NEO-10 events are now visible to Remote Database Reviewer clients. This should work retroactively: previously recorded NEO-10 events will now be visible to RDR clients.
- NEO-10 events now correctly record the event-triggering NEO-10's IP Address. Previously the Network Recorder's IP Address was incorrectly recorded.
- In Database Reviewer, archiving records no longer fails and crashes.

### 5. Minor Changes

(none)

### 6. Installation and Upgrade

If using Network Recorder older than 4.300:

- Using the Add/Remove programs wizard, remove any previous version of Network Recorder.
- Download and install Network Recorder 4.300 using its automatic installation script.
- Continue with the instructions listed below.

If using Network Recorder 4.300:

- Using the Add/Remove programs wizard, uninstall Network Recorder 4.300.
- Install Network Recorder 4.400 by running Telex Network Recorder.msi

Be sure to use Remote Database Reviewer 1.000 with Network Recorder 4.400
