Bosch Security Systems, Inc. 12000 Portland Ave. South Burnsville, MN 55337 www.boschcommunications.com

## Wireless Microphone Re-Banding Pro Net Price List

Bosch Security Systems, Incorporated ("Bosch") wants to help our end users deal with their concerns confronting the white space allocations issues. To assist our customers in reconfiguring their wireless microphones that currently operate in the reallocated 700MHz band, we are pleased to offer a re-banding program for the following products. All products that are re-banded will be refurbished to a "like new" condition and, in some cases, will be replaced with equivalent new product. This re-banding service includes return shipment via UPS Ground. If faster return shipping is required, please indicate the desired shipping method and the cost will be added to the invoice.

If you have any questions about the re-banding program, contact Customer Service at 800-553-5992.

Re-Band Price         RE-2 / FMR-500 Receiver       \$125         HTU2/HT-500 Handheld       \$100         BPU-2/WT-500 Bodypack       \$70         RE-2 PRO Re-Banding from B to A or G         HTU2PRO       \$250         BPU-2PRO       \$250         REV C5 Band to C1, C2, C3         REV-S Single Receiver       \$600         REV-D Dual Receiver       \$900         REV-H Concert Vocal Handheld       \$250         REV-BP Bodypack       \$250         REV-PH Presentation Handheld       \$200         SAFE-1000 B Band to A2, F or G         SAFE-1000 Receiver       \$450         SAFE-WT bodypack       \$400         SAFE-HT Handheld       \$400

Older Telex and EV products in the 700MHz band not listed here qualify for a Relocation Rebate up to a total of \$500 on purchases of new product. The rebate offer runs from March 23, 2009 to August 31, 2009. See www.electrovoice.com for details or contact your local Bosch Communications Sales Representative.

Send eligible product for re-banding to:

Bosch Security Systems, Inc. Wireless Mic Re-Banding Program 8601 East Cornhusker Highway Lincoln, Nebraska 68507

Please specify the desired frequency band. If you are uncertain which band is best for your area, provide the location (including zip code) that the product will be used and Bosch will select a band for you. If the re-banded product needs to be coordinated with other existing wireless equipment, include the location and details for all other equipment (quantity and frequency band) to be used at that site. Or contact Technical Support at 800-392-3497 for coordination help.
