K	09/23/09	Radio Dispatch Engineering Group	Release 4.400
L	10/27/09	Radio Dispatch Engineering Group	Beta Release 4.401
M	5/16/12	Radio Dispatch Engineering Group	Release 4.500

### 2. Overview

This release contains improvements and enhancements, which are listed in the new features section of this document, as well as fixes to reported problems from previous releases.

### 3. New Features

- Now supports G726 16k and G711 64k PCM audio.
- P25 DFSI compatible. Connects as a client to a C-Soft console enabled server.
- Emergency Acknowledge and clear events are now logged in the database.
- Supports iDEN emergency events.
- Dependences on Sound card for timing have been removed. Recorder can operate without a sound card but live monitor and playback will be non functional.
- NEO-10 relay and input events can now be assigned aliases. Event aliases are searchable using Network Recorder Database Reviewer.

### 4. Feature improvements and known issues fixed in this release

- (none)

### 5. Minor Changes

- (none)

### 6. Installation and Upgrade

If using Network Recorder older than 4.300:

- Using the Add/Remove programs wizard, remove any previous version of Network Recorder.
- Download and install Network Recorder 4.500 using its automatic installation script.

## Network Recorder Version 4.500 Release Notes

- Continue with the instructions listed below.

If using Network Recorder 4.300 or later:

- Using the Add/Remove programs wizard, uninstall Network Recorder 4.300 or later.
- Install Network Recorder 4.500 by running Telex Network Recorder.msi
