1. Revision History

Revision	Date	Author	Description
A	05/29/09	Software Engineering Group	Beta Release
B	05/09/12	Software Engineering Group	Minor Release

2. Overview

This release contains improvements and enhancements, which are listed in the new features section of this document, as well as fixes to reported problems from previous major release (1.000).

3. New Features

- Added the Line Permissions Dialog, which displays a list of lines that the user has access to. This is a part Network Recorder's ability to restrict accounts to only specified lines.
- Added support for Windows 7 64-bit installation.

4. Feature improvements and known issues fixed in this release

- Network Recorder connection session bug fixes. Multiple computers can no longer log in with the same account. Sessions are now associated with an IP address.
- Audio play no longer stops when RDR is minimized.
- Using RDR on a "Limited" Windows account now works (such as the NexusIP's Dispatch account). The audio cache folder was moved to the local application data path.
- Improved database structure for faster queries.
- Added a limit to the number of ANI and Frequency filters that can be specified at one time (5 ANI, 5 Frequency). Queries filtered by Frequency or ANI were slow, and would cause the Network Recorder's MySQL server to hang. This may be changed in further releases.

5. Minor Changes

- Columns misc1, misc3, misc4, misc5, and misc6 were removed from the Choose Columns Dialog. These columns contained no useful data.
- Several warnings dialogs were added to inform the user about invalid filter settings (begin date was chronologically later than end date, min duration greater than max duration, etc)
- Export Task Progress Dialog: close button is now always enabled.
- Added Refresh buttons to ANI and Frequency Alias windows.
- Control + A now selects all in both ANI and Frequency Alias tables.
- Removed skin options.

6. Installation and Upgrade

Simply run setup.exe. This will automatically install the prerequisite programs if not already installed.
