TELEX
## RADIO DISPATCH PRODUCTS

Prerequisites

• Sprint Direct Connect* service from Sprint*

• Sprint Direct Connect license key from Telex Radio Dispatch (purchased option)

• IP-224 Ethernet adapter panel from Telex Radio Dispatch

• AdvanceBridge* and interface cable from AdvanceTec

Configuration

NOTE: For detailed instructions on configuring the Sprint Direct Connect interface, see the Sprint Direct Connect Interface Application Guide (F.01U.298.343).

Step 1. Activate Sprint Direct Connect Interface (purchased option)
To **activate the Sprint Direct Connect Interface**, do the following:

1. Open the **IP-224 webpage**.

2. From the left navigation, select **Additional Features**.
   The Additional Features page appears.

3. In the Access Key field, enter the **32-character option key**.

4. Click the **Submit button**.
   The Access Key is submitted.

5. From the left navigation, select **Save Parameters**.
   The Save Parameters page appers.

6. Click the **Save Parameters button**.
   Changes are now permanently saved to the IP-224 console.

Step 2. AdvanceBridge Setup (See Installation)

Step 3. IP-224 Setup

Step 4. C-Soft

Important: The Multicast Address and SOIP configured in the IP-224 webpage must match the C-Soft configuration.

Quick Start Guide
Sprint Direct Connect

Installation

To **connect the IP-224 Ethernet adapter panel to the AdvanceBridge**, do the following:

1. Connect the **DB-37 end of the AdvanceBridge interface cable to RADIO 1** or **RADIO 2 connector**.

2. Verify the AdvanceBridge is **powered off**.

3. Connect the **DB-15 end of the AdvanceBridge interface cable to the AdvanceBridge**.

4. Plug the **power cable** to power on the AdvanceBridge.
   The power LED is solid green when it connects to the IP-224.

5. Repeat **steps 1-4** to connect a second AdvanceBridge to the IP-224, if necessary.
