1.6 Claims

No liability will be accepted for damages directly or indirectly arising from the use of our materials or from any other causes. Our liability shall be expressly limited to replacement or repair of defective materials.

1.7 Warning

**Notice!**

This is a class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

1.8 PC & Network Security consideration

No system can be 100% protected against security threats. However, there are measures both manufacturers and users can do to help reduce the likelihood of a malicious attack resulting in either the loss of data or system takeover. We evaluate and improve our products continuously to protect against such attacks. This is only one safeguard used to reduce the likelihood of such an event. There are many more considerations needed to implement measures to strengthen your network security.

We strongly recommend the following considerations:

- Deploy Dispatch products and software on isolated networks that do not connect to other networks, when possible.
 - Apply the latest Windows updates and install up-to-date IT security software.
 - User rights should be properly administered using group policies to prevent unauthorized use of USB connected devices.
 - If the Dispatch network must connect to other networks, install and properly maintain firewalls and intrusion detection systems.
 - If Dispatch devices or computers use the Internet to connect, a VPN or tunnel connection should be utilized. Examples of such products are those made by DCB (Data Communications for Business), Cisco, and others.
-

**Notice!**

Bosch recommends utilizing the services of IT professionals knowledgeable about network design and the Linux operating system when configuring a Console Management System PC.

2 CMS License Installation

Overview

These instructions are intended for a customer purchasing a Telex Console Management System or has purchased an upgrade license to enable a new feature for their device.

Equipment

Prior to receiving these instructions, you should receive one or more emails containing Entitlement Certificates. The Entitlement Certificates contain one or more Activation IDs. Activation IDs look like software serial numbers in the form of xxxxx-xxxxx-xxxxx-xxxxxx-xxxxx-xxxxx-xxxxxx.

Requirements

- Console Management System after initial setup stage
- One or more Activation IDs
- Activation to Bosch System Activation Website (<https://licensing.boshcsecurity.com>)
- Username and password for System Activation Website

Licensing Instructions

To **license the Console Management System**, do the following:

1. Open a **web browser** and navigate to the **CMS website**.
2. Enter a **valid username and password** to log onto the CMS webpage.
3. Navigate to **System | Licensing**.

The Licensing page opens.

NOTE: If installing fail-over (two CMS), only have one unit attached at a time while licensing. Once you complete licensing on one unit, disconnect the unit and proceed to license the second unit.

Create RequestDeploy Response

© Copyright 2

1. Click the **Create Request** button at the bottom of the page.
The Generate Capability Request screen opens.

Generate Capability Request

×

Enter Activation ID(s)

XXXXXX-XXXXXX-XXXXXX-XXXXXX-XXXXXX-XXXXXX-XXXXXX

Add

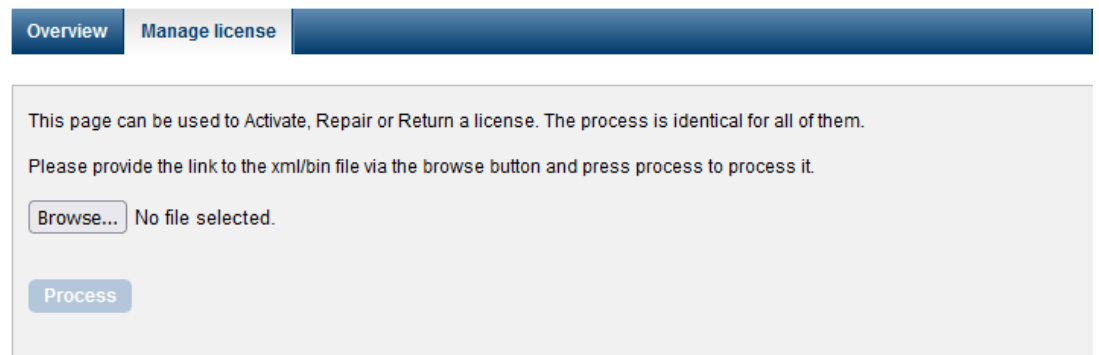

Activation ID	↑↓
00000-00000-00000-00000-00000-00000-00000	

Generate Request

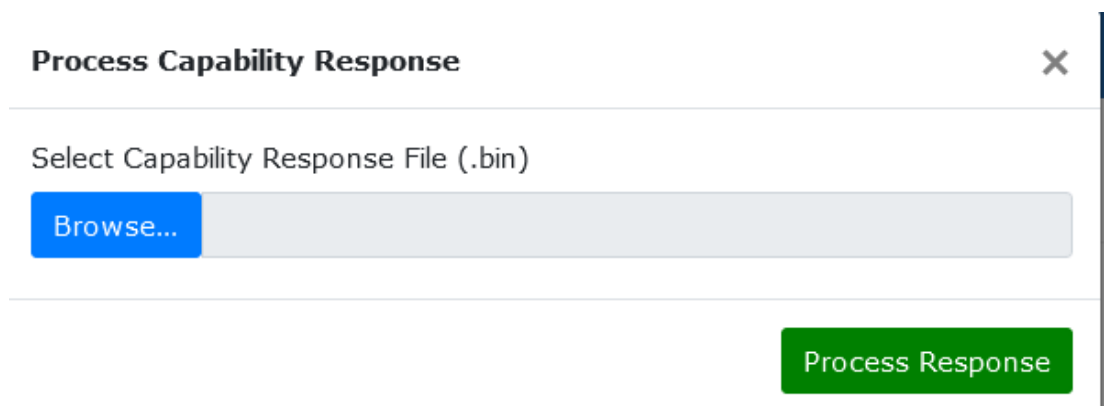

Cancel

2. For each Activation ID, enter the **Activation ID** and then press **Add** to add it to the list of Activation IDs.
3. When finished, press the **Generate Request button**.
You will be prompted to download the CapabilityRequest_XXXXXXXXXXXXX.bin, where the Xs match the CMS' Host ID. Save the file to a local, easily accessible location. Leave the CMS Licensing page open for later use.
4. Open the **Bosch System Activation website** (<https://licensing.boschsecurity.com>)
5. Login using your **username and password**.
6. Navigate to the **Manage license page**.

System Activation Site

7. Press the **Browse button**.
8. Select the **ResponseRequest.XXXXXXXXXXXXXX.bin**.
9. Click the **Process button**.
You will be prompted to download the CapabilityRequest_XXXXXXXXXXXXX.bin.
10. Click the **Deploy Response button** at the bottom of the page.
The Process Capability Response screen opens.

11. Click the **Browse button**.
12. Navigate to and select the **ResponseRequest_XXXXXXXXXXXXX.bin file**.
13. Click the **Process Response button**.
The Status text box displays feedback information from the license deployment procedure.
14. Click the **Close button**.
The newly deployed license displays on the CMS Licensing page. The new license has been applied and the new features are now available.

The logo consists of the word "TELEX" in a bold, white, sans-serif font. The letters are outlined with two horizontal lines, one above and one below the text.
