TEAM:**

## NEXT-LEVEL **SIMPLICITY**

The IP-3101 Series expands the proven IP-3100 family with a **cost-effective two-line IP console** that pairs with the IP-224 Radio Gateway for a simple, reliable dispatch solution.

Supporting up to **16 channels** and compatible with a wide range of radios via IP-224 serial control, the IP-3101 Series offers **flexible deployment and broad interoperability** for everyday operations.

# IP-3101 SERIES: BUILT FOR DEPARTMENTS THAT NEED CLARITY, NOT COMPLEXITY

## *Your Next Upgrade Starts Q3 2026*

We're expanding the proven IP-3100 family with a new, cost-effective two-line IP console designed for teams that need reliability without complexity. With front-panel configuration for IP addressing and simple web-based programming for all other functions, the IP-3101 Series delivers fast, straightforward deployment. This streamlined setup approach reduces install time, simplifies adjustments, and offers a level of deployment ease not typically found in consoles with similar capabilities.

The IP-3101 Series is built for real-world interoperability, supporting a broad lineup of radios through the IP-224 using serial control. This wide compatibility ensures the IP-3101 Series fits seamlessly into mixed-fleet environments, simplifies migration strategies, and keeps teams connected regardless of the radio manufacturer in use.

**With front-panel IP addressing and simple web-based programming for all other functions, the IP-3101 Series delivers deployment ease unmatched by similar consoles. Features include:**

- Two Lines of IP-224 control
- Main PTT and Line Select Buttons
- Volume Control
- Frequency Change Up/Down Buttons
- SCAN and Intercom
